Profile SUMMARY

Thoroughly experienced technical solution provider in computer programming and have 9+ years of experience in System analysis, Software Design, Architecture, development, Testing and deployment using .NET framework and other Microsoft technologies. Currently working in Datumsoft Technologies and involved in developing windows and web based enterprise projects for the clients. Having strong expertise in Service Oriented Architecture, Object Oriented Design and Development. Proven track record of consistent performance in high volume, demanding business environment in IT development teams with hands on experience in Architecture, design and development.

Experience SUMMARY

- 10 years of software Management, Architecture, design, Testing and development experience.
- 6+ Years of experience on Designing Medium and large scale web and windows forms application.
- 4+ years of Rapid Application Development experience.
- 3+ years of Performance tuning and profiling experience on ASP.NET based applications and Custom server applications.
- 1+ years of experience in developing (APEX), administering and configuring Salesforce application, proficient with Salesforce API data load tools.
- Pioneer in using latest Microsoft technology. Using .NET and C# since their beta stage.
- 3+ years of experience in data integration and data transformation using SSIS.
- 2+ years of experience in creating reports using SSRS.
- Effectively developed reports using Crystal Reports, SQL Server Reporting Services and MS office API's (MS-Word and MS-Excel)
- Good Expertise in Developing WCF (Windows Communication Foundation), Web Services (SOAP, UDDI, WSDL), Server Components and implementing Remoting with .NET
- Capable interacting with clients in Managing Products, Identifying System Requirements and Developing System Specifications.
- Well versed with Requirement Analysis, Change Management, Software Lifecycle, Product Quality, Review Process, Process Defect Management, Process Improvement and Implementing Best Practices.

- Good Expertise in Database Design, Stored-Procedures, Triggers & Functions in SQL Server 2000/2005/2008/2008R2 & Oracle9i.
- Solid understanding of distributed systems, architecture, design and development
- Hands-on experience in Object-Oriented analysis, design and programming
- Ability to provide ultimate solutions for business problems using Microsoft Platform.
- Good understanding on Microsoft platform system internals.
- Having knowledge in Adobe Flex 4.0, Actionscript and ColdFusion.
- Creative, Independent thinker with good analytical skills.

Certification SUMMARY

- Microsoft Certified Professional Developer : ASP.NET 3.5
- Brainbench Certified C# Developer.
- Brainbench Certified ASP.NET Developer

SKILLS SUMMARY

- **Operating systems** : Windows Server 2008, 2008R2 , Windows 7
- **Platforms**: .NET framework 2.0, 3.0, 3.5 and 4.0, ASP.NET, ASMX Web Services, WCF web services, Classic ASP, COM, DCOM and ActiveX Controls & .NET Remoting.
- **Framework** : ASP.NET MVC, Ajax, Enterprise library, Smart client
- **Programming languages**: C# , VB.NET, VB 6.0, VB 5.0, VBA, C, C++, Razor
- **Source Repository**: TFS, VSTS, PVCS and VSS
- **Design Tools** : Microsoft Visio and Visual Studio 2008 Architect Edition
- **Application Life cycle Management** : Visual Studio Team System
- **Development Processes** : SDLC with Waterfall, Scrum & Agile
- **Reporting tools** : Crystal report, Data Report, SSRS, SSIS
- **Other tools**: NUnit, IE developer Tools, Fiddler, Telerik, Obout
- **Scripting**: VBScript , JavaScript/Jscript, JQuery

- **Server Applications:** IIS 7.0 [Microsoft Internet Information Server], Component Services, SQL Server 2000, 2005 & 2008, Oracle 9i and 11g with ODAC.NET, SharePoint 2010.
- **Cloud Technologies:** Salesforce, Windows Azure

PROFESSIONAL EXPERIENCE

Employer : Datumsoft Technologies
Date : Oct 2013 to Till Date
Title : Principle Application Developer
Client : Kerzner International North America Inc., FL
Technology : Visual Studio .NET 2012, .NET Framework 3.5/4.0, C#.Net, ASP.NET, AJAX, IIS, JQuery, T-SQL, Microsoft SQL Server 2008/2008R2, MVC, WCF, VSS, MS Visio, N-Unit, Java script, XML, XSLT, Telerik, Razor, HTML5, REST, Parellax Scrolling Effect, Content Management System (CMS), Sitecore, Windows server 2008.

Projects : One & Only Resorts (Atlantis & Palm Dubai)

- Responsible for Design, Development, Testing and Deployment of System and Application
- Involved in defining User Requirements, User Interface Design and Document Presentations.
- Developed using custom framework.
- Developed various style sheets using CSS for formatting ASP.NET Pages.
- Developed web pages using HTML5, XML and XSLT.
- Effectively handled Geolocation, Audio and Video process using HTML5.
- Used Web services to communicate with the business layer objects.
- Created Complex queries and Stored Procedures.
- Effectively used Content Management System (CMS) to design web pages
- Performed Unit Testing, Integration Testing, Troubleshooting and Bug Fixing.
- Designed and Developed functionality for profile based access to information.
- Extensively used Parellax Scrolling Effect for developing web application.
- Participate in the complete software development lifecycle using Agile methodologies such as SCRUM, TDD and XP.

Employer : Datumsoft Technologies
Date : Apr 2010 to Sep 2013
Title : Sr. Software Engineer
Client : Department of Energy (DOE), Washington DC
Technology : Visual Studio .NET 2010/2012, .NET Framework 3.5/4.0, C#.Net, ASP.NET, AJAX, IIS, Telerik, JQuery, HTML5, T-SQL, Microsoft SQL Server 2008/2008R2, WCF, VSS, MS Visio, N-Unit, Java script, XML, SOAP, SSIS, SSRS, Windows 7 and Salesforce.

Projects : 1. Corporate Planning System (CPS) 2. LabRating Tool (LRT) 3. Customer Service Center (CSC) 4. Account Management System (AMS) 5. Impact – Grant Monitoring System 6. Support Service Information (SSI) 7. OrgChart 8. Simple Inventory System (SIS) 9. Conference Room Reservation (CRR)

10. Timecard Management

- Responsible for Design, Development, Testing and Deployment of System and Application
- Involved in defining User Requirements, User Interface Design and Document Presentations.
- Worked as Middle level Architecture designer and implemented N-Tier Architecture.
- Developed Reports using MS- Excel, MS-Word using XML and XSLT.
- Effectively handled HTML5, JQuery, Telerik, AJAX and AJAX-Toolkit concepts in all the Webforms.
- Created dynamic web pages effectively using HTML5.
- Developed various style sheets using CSS for formatting ASP.NET Pages.
- Involved in analysis, designing and creation of database.
- Administer SQL Server 2008 with Client/Server tools including SQL Server Management studio, SQL Server Profiler.
- Developed various reports using SSRS.
- Developed new Stored Procedures and modified some existing Stored Procedures to comply with the functionality.
- Performed Unit Testing, Integration Testing, Troubleshooting and Bug Fixing.
- Designed and Developed functionality for profile based access to information.

Employer : **Archer Daniels Midland Company. - IL**

Date : Aug 2008 to Apr 2010

Title : Client Server Programmer Analyst II

Projects : Warehouse Management System [WMS].

Technology : Visual Studio .NET 2005, .NET Framework 3.5, C#.Net, ASP.NET, AJAX, , IIS, T-SQL, Microsoft SQL Server 2005,WCF, TFS, MS Visio, N-Unit, Java script, XML, SOAP, Windows XP.

- Responsible for Design, Development, Testing and Deployment of WMS System and Application
- Involved in defining User Requirements, User Interface Design and Document Presentations.
- Developed Service Component using WCF(Windows Communication Foundation) to handled resource allocation, to get information from other internal webapps.
- Worked as Middle level Architecture designer and implemented N-Tier Architecture.
- Developed Reports using Sqlserver2005 Reporting Services (SSRS).
- Effectively handled Data transformation and integration using SSIS.
- Effectively handled AJAX and AJAX-Toolkit concepts in all the Webforms.
- Developed various style sheets using CSS for formatting ASP.NET Pages.
- Involved in analysis, designing and creation of database.
- Administer SQL Server 2005 with Client/Server tools including SQL Server Management studio, SQL Server Profiler.
- SQL Server Integration Services (SSIS) is a component and perform a broad range of data migration tasks.
- Developed new Stored Procedures and modified some existing Stored Procedures to comply with the WMS functionality.
- Performed Unit Testing, Integration Testing, Troubleshooting and Bug Fixing.
- Designed and Developed functionality for profile based access to information.

Employer : **Nexage Technologies USA Inc.**

Date : Sep 2007 to Jul 2008

Client : Citi Bank, SD

Title : Consultant, MIS Quality Development.

Projects : MIS Quality

Technology : Visual Studio .NET 2005, ASP.NET, C#.NET, .NET Framework 2.0, SQL Server 2005, ADO.NET, OOAD, UML, Web Services, Java Script, IIS, XML, XSLT, XPATH, Application Blocks, PVCS, Windows XP, Reporting Service, SSIS.

- Responsible for Design, Development, Testing and Deployment of NMIS Quality System and Application
- Involved in defining User Requirements, User Interface Design and Document Presentations.
- Worked on Microsoft Enterprise Library component (Application Blocks).
- Developed Enter Quality, Sample Search and Admin module with ASP.NET web forms, C# and SQL server 2005.
- Developed Reports using Sqlserver2000 Reporting Services.
- Developed Web Service to information from general Database.
- Effectively handled AJAX and AJAX-Toolkit concepts in all the Webforms.
- Developed various style sheets using CSS for formatting ASP.NET Pages.
- Involved in analysis, designing and creation of database.
- Effectively implemented MVC Design Pattern.
- Effectively used DTS component to transfer data from the databases.
- Administer SQL Server 2005 with Client/Server tools including SQL Server Management studio, SQL Server Profiler and SQL Server Business Intelligence Development Studio.
- Developed new Stored Procedures and modified some existing Stored Procedures to comply with the NMIS Quality functionality.
- Performed Unit Testing, Integration Testing, Troubleshooting and Bug Fixing.
- Designed and Developed functionality for profile based access to information.

Employer : Nexage Technologies USA Inc.

Date : Jan 2007 to Sep 2007

Client : The Princeton Review, NY

Title : Consultant

Projects : Course Finder (CF)

Technology : C#.NET, SQL Server 2000, ASP.NET, ADO.NET, Application blocks, Excel sheets, Reporting Service, Visual Studio.NET, Star Team, NUnit 2.1, XML, XSLT, Windows 2003 Server.

- Responsible for Design, Development, Testing and Deployment of Course Finder System and Application
- Involved in defining User Requirements, User Interface Design and Document Presentations.
- Effectively worked in the migration of the old System from classic ASP to ASP.NET 2.0
- Worked on Microsoft Enterprise Library component (Application Blocks).
- Developed a User-Control which is used for searching courses from anywhere in the website (Applied AJAX for effective searching).
- Developed the Course Enrollment and Course Search module with ASP.NET web forms, C# and SQL server 2005.
- Developed the Credit Card processing module with ASP.NET web forms and C#.
- Participate in the development of PARC web service which is used for Credit Card processing, Registering Customer, ECheck Processing.
- Developed E-mail component which can get E-mail content from Text/XML file and send the E-mail to the student and management.
- Effectively handled AJAX concepts in all the Webforms.
- Effectively implemented MVC Design Pattern.
- Effectively used Lyris List manager for E-Mail Transactions and Management.
- Developed various style sheets using CSS for formatting ASP.NET Pages.
- Created Low Level Design and High Level Design all the CF modules.

- Performed Code Review for Optimizing the Application.
- Administer SQL Server 2005 with Client/Server tools including SQL Server Management studio, SQL Server Profiler and SQL Server Business Intelligence Development Studio.
- Developed new Stored Procedures and modified some existing Stored Procedures to comply with the CF functionality.
- Performed Unit Testing, Integration Testing, Troubleshooting and Bug Fixing.
- Effectively Used Star Team (Borland Product) for version control.
- Designed and Developed functionality for profile based access to information.

Employer : Nexage Technologies India Pvt Ltd
Date : Jul 2006 to Dec 2006
Clients : AIG, Houston
Title : Programmer Analyst
Projects : Structured Settlement (SS)
Technology : .NET Framework 2.0, Visual Studio 2005, ASP.NET, C#.NET, ADO.NET, Webservices, AJAX, XML, HTML, CSS, SQL Server 2000, MS Visio, IIS, VB script, VSS, Microsoft Product Studio, Windows XP.

- Effectively used Microsoft Enterprise Library component (Application Blocks).
- Worked on enhancement of most of the modules of Structured Settlement to support agent to interact with home office staff regarding their claimant details
- Modified the existing Add-Event module to support functionality of “Structured Settlement”.
- Developed a User-Control which accepts Agent and Admin assistant informations as input and allow performing various operations and adding additional details for each agent or admin assistant.
- Developed the Medical, Premium Commission and Issue Requirements module with ASP.NET web forms, C#.
- Developed the Admin module with ASP.NET web forms and C#.
- Effectively implemented Multi-Layer Architecture for developing the Agent Website and Admin modules.
- Developed Windows Services to start the Batch Process which send an E-Mail automatically to the claimant with attachment.
- Developed a component for communicating to Right Fax Server and getting agent’s Faxes in Tiff format.
- Developed User Interface using AJAX for Admin and Agent Website modules.
- Developed a Component for converting the reports in to Excel sheets.
- Developed an editable Grid-View with different child controls which allows editing of the grid as a whole (or) editing each row individually.
- Developed various style sheets using CSS for formatting ASP.NET Pages.
- Created Low Level Design for the Agent Website and Admin Modules.
- Performed Code Review for Optimizing the Application.
- Created many new Stored Procedures and modified some existing Stored Procedures to comply with the SS functionality.
- Written TSQL-Statements to fill the rows, of the new SQL Tables created for SS functionality, with data from the records of existing SQL Tables.
- Performed Unit testing, integration testing, troubleshooting and bug fixing.

Employer : Nexage Technologies India Pvt Ltd
Date : Jan 2004 to Jun 2006
Clients : Assaying Ltd

Title : Programmer Analyst
Projects : Custom ERP Application.
Technology : .NET Beta, .NET1.0, ASP, ASP.NET, Visual Basic 5.0, Visual Basic 6.0, COM, DCOM, MTS, ActiveX Control, Win32 APIs to Dial Remote computer

- Developed Business Logics for various modules for Business Layers & Data Layer using C# and ADO.net.
- Developed ASPX pages and Business logic in C# for Sales & Accounts Management, Inventory Management, Purchase Management and Exim modules.
- Created Stored Procedure, Function, views and Triggers.
- Involved in Low Level Design of all major modules
- Using Web.Config file for configuring Connection Strings, Handling Custom Error, Maintaining Sessions and Providing Authentications for the application.
- Sales order, Employee Accounting Details, Purchase order/Invoice, Production Planning, Marketing Details, Product Delivery Reports and generated using Crystal Report.
- Effectively used CSS and DHTML for formatting ASP.NET pages
- Performed Code Optimization, Code Review, integration testing, troubleshooting and bug fixing.

EDUCATION

- Masters in Computer Application
- Bachelor of Physics.
